

Professional Polishing Services

Your Partner In Polishing

PPS are pleased to announce their investment in an additional 2mtr wide Multi-Head Grinding Line for Hot Rolled Plate.

Commissioned in January 2016 this line increases our maximum thickness produced via a wide-band route from 10mm thick to 20mm thick. With heavy duty extra-long conveyors this also means that plates up to 2 tonne in piece weight can be produced with this supreme uniform finish rather than a traditional narrow band route.

With state of the art software the machine is programmed to give maximum defect removal whilst keeping the surface as cool as possible to reduce stress relieving. Uniformity is crucial and the line produces an excellent finish. From a coarse ground to an exceptional IK Finish we can ensure the highest quality finish for your project and our flexibility will help you with the tightest of deadlines.

For more information talk to our Commercial Team on 0121 555 6569 and request your free sample of this finish.
